

LED thin panel fixtures are now the solution of choice to replace traditional office fluorescent fixtures. In addition to the benefit of energy efficiencies, our edge-lit sealed ultra-thin fixture has a clean and stylish design that provides for low maintenance and easy installation.

LED Rite's robust design delivers high performance at a great value. The below illustration highlights the care and attention to the design, construction and materials that go into all of our LED edge-lit ultra-thin panel.

Since the introduction of this new product, we had confirmed the performance in a wide variety of small and high volume market applications. We can provide volume pricing on a wide variety of in stock configurations. Please contact us for more information.
